# DANNY'S STORY

Danny is 29 years old and enjoys working the community. He spends time volunteering for several non-profit organizations. He loves his volunteer work as it provides him a meaningful way to help others. Danny is passionate about baseball, both the Brewers and the Milkmen. He loves traveling to new places and tracking flights of his loved ones, you won't miss a delay on his watch. Danny spends his free time training under the functional patterns program, swimming, and spending time with his family. Combining his two favorite hobbies: baseball and travel, Danny currently has the goal of attending a Brewers away game in a new city each year. This summer he will go to Boston to see the Brewers play on his birthday!

in

He was born with Spina Bifida, the most common permanently disabling birth defect in the United States. Spina Bifida causes abnormal functions in three primary areas: the central nervous system (brain and spinal cord), the urological system (kidneys and bladder), and the musculoskeletal system (bones and muscles). As a result, several body systems cannot function properly, making it a lifelong condition. People with Spina Bifida require on-going medical care including therapy, medication and surgeries. Although Spina Bifida is not curable, most people born with this disability will live full productive lives.

Danny is surrounded by a large and loving family. His uncle, Tom, is the chairman for this golf outing in honor of Danny. This event is a bright spot in Danny's year. He is very touched by all the support the outing brings. The funds raised from this event will support the programs and services provided by Spina Bifida Wisconsin. They are changing lives and helping others like Danny grow and fulfill their dreams.
